Profile

Passionate Game Developer dedicated to blending technical execution with narrative vision to craft immersive experiences. A collaborative problem-solver skilled in thoughtful level design and rapid prototyping, seeking to build high-quality game systems in a professional studio.

Education

9-Month Post-Graduate Diploma - Game Programming Track, Information Technology Institute (ITI)	10/2025 – Present Smart Village, Cairo, Egypt
Bachelor of Computer and Information Sciences, Specialization in Digital Multimedia, Ain Shams University and University of East London GPA: 3.148	10/2021 – 07/2025 Cairo, Egypt

Internships

Internship Trainee, CIB Egypt	07/2024 – 08/2024 Remote
Game Development Training using Unity, Information Technology Institute (ITI)	07/2024 – 08/2024 Cairo, Egypt

Skills

Tools - AR Core - XR Interaction Toolkit - Meta SDK - UI Toolkit - OpenXR	Game Engines & Graphics - Unity Engine - Unreal Engine - SFML - OpenGL Version Control - GitHub - Unity Version Control (UVC)	Core Concepts - Object-Oriented Programming - Data Structures - Design Patterns
Personal Skills - Communication - Leadership - Presentation Skills - Research		

Projects

Graduation Project (The Learning Lens), Backend Developer and Team Leader ali-hy/the-learning-lens at dev Shokryy/the-learning-lens-ar	10/2024 – 07/2025
- Led backend development for a Unity-based VR/AR application, developing backend services with .NET and EF Core while working closely with the Unity development side and gaining a comprehensive understanding of the application's Unity architecture, gameplay systems, and backend integration. Technologies: Unity, C#, .NET, EF Core, Python	
Resource Management Game (Unity, C#) Developing scalable core C# gameplay architecture, UI layouts, and meta-progression systems for a mobile title commissioned by a major national financial institution	05/2026 – Present
VR Wave Shooter (Unity, C#, XRIT) MahmoudHany908/VR_Shooter	04/2026
Developed an immersive wave-based VR shooter optimized for standalone headsets. Scripted dynamic round progression, scalable enemy spawning, and a strict ammo economy.	

Subject Null - VR Puzzle Game (Unity, Meta Quest 2/3)
<https://nightfuryexe.itch.io/subject-null>

02/2026

- Designed levels, puzzles, and core gameplay mechanics including dynamic mesh slicing and distinct vision states for a narrative driven VR game. Additionally, implemented Unity Version Control to facilitate seamless project iteration.

ESCCTRL 2D Atmospheric Platformer (SFML)
[eslam135/ESCCTRL](https://senpaii2.itch.io/escctrl)
<https://senpaii2.itch.io/escctrl>

12/2025

- Designed intricate levels focusing on shape-shifting mechanics and tight spatial navigation within a 3-day game jam.
- Created a dynamic environment using deep parallax layering to react to player movement.
